Global Trade Management

Global Trade Management

Faster Clearance Through Customs

Reduction in Total Landed Cost

Lower Required Safety Stock Levels

Improved Working Capital Position

Minimize Penalties

Eliminate Redundant Systems

Leveraging SAP® Global Trade Services (SAP® GTS) Streamlines Your Import/Export Processes

Virtually every business is looking to source, make and deliver products globally, especially in far-reaching markets like China. Managing the process to get goods into and out of foreign markets has never been more complex, time-consuming and frustrating. The transaction cost alone for each international shipment is estimated at over \$380. By automating the end-to-end process with a system such as GTS, you can slash your transactional costs by over 80%, plus realize bottom-line savings in broker's fees, reduced safety stock levels and more.

Our experience can help you determine where your company can become more efficient, eliminate waste and gain a competitive edge by deploying best-in-class solutions.

Effortless NAFTA/EU Compliance

EntryPoint deploys best practices for ensuring your NAFTA/EU operations are efficient and automated. You can be assured that you are fully compliant without having to worry about handling the paperwork.

Learn How to Use GTS to Screen Visitors to Your Facility

As part of the myriad of federal regulations, it is critical that you know exactly who is working for you and who visits your facilities on a daily basis. EntryPoint can help fill this gap by utilizing SAP's Global Trade Services and International Denied Party List screening for visitors to your facilities. The same functionality may also be used to screen your global employee base and all of your trading partners.

Automate your international trade processes, drive your transaction costs down by over 80% and better ensure compliance with federal trade laws.
